

12mm LED Metal Panel Indicator Light
12mm LED Metal Panel Indicator Light

12mm LED Metal Panel Indicator Light 12V ~ 24VDC. The high-quality metal LED is a new type of signal indicator. These new LED features have a long life, high brightness, low energy consumption, safety and reliability, beautiful appearance, exquisite production, and multiple functions.

Feature/Specs:

SL No.	Parameter	Value and Unit
1	Part No	12VB
2	Material	Nickel Plated Brass
3	Voltage Rating	12 ~24 VDC
4	Current Consumption	5 ~20 mA
5	Lamp Type	Non-polarity LED
6	Termination type	Solder Type
7	Colour	Red, Blue, Yellow, Green
8	Operation Temperature	0°C ~ +80°C
9	Mounting Dia	12 mm
10	Length	25 mm
11	Approx Weight	10 gm

Dimension in: mm
